

**ISTH Educational Course:
“Thrombotic disease: diagnostics, prevention and therapy”
October 9-10, 2019, Saint Petersburg**

Hans Deckmyn
(Belgium)

- von Willebrand factor

Coenraad Hemker
(the Netherlands)

- Thrombin Generation

Robert Ariens
(United Kingdom)

- Fibrinogen & Fibrin

Anna Falanga
(Italy)

- Thrombosis & Cancer

Invited Lectures

Coenraad Hemker (the Netherlands)

- *A century of heparin: past, present and future*

Hans Deckyn (Belgium)

- *Platelet interactions under flow and their role in thrombi formation*
- *Thrombotic thrombocytopenic purpura: current state of art and recent advances*

Rorert Ariens (Unighted Kingdom)

- *Clot structure and function in thrombosis and haemostasis*
- *Fibrin biofilm – a new structure of the clot with important function*

Anna Falanga (Italy)

- *The mechanisms of cancer-associated thrombosis*
- *Hemostasis biomarkers in cancer progression*
